PRESS RELEASE

IMMCO wins Bentley *Be Inspired* Award for Innovation in Communications Networks

Award was received for an Automated Quality Control Toolkit that works seamlessly with Bentley Expert Designer Communications V8i.

Alpharetta, December 3, 2012: IMMCO today announced winning Bentley's prestigious *Be Inspired* Award for Innovation in Communications Networks for their development of an Automated Quality Control Toolkit. The toolkit works directly with Bentley Expert Designer Communications V8i product to ensure Hybrid Fiber Coaxial (HFC) design and data construction is done to meet the highest standards.

The Automated Quality Control Toolkit checks thousands of miles of outside plant (OSP) data, stored in Oracle Spatial, to identify a wide range of potential errors. The toolkit works within the Bentley environment to provide workflows and methods to quickly review and fix errors. This helps to ensure accuracy, consistency, and data integrity while significantly reducing review time and costs. Accurate data is vital to cable and broadband operators, who use their data for critical applications such as serviceability analysis, customer provisioning, inventory tracking, facility and equipment maintenance, and network planning.

"We are thrilled to have been honored with this award" noted Dr. Ramesh Iyer, President of IMMCO.

"Bentley is a best-in-class technology partner and their innovative suite of communications network design products is unrivaled for communications network design."

Bentley's *annual Be Inspired Awards* program is the only competition of its kind that is global in scope and comprehensive in the categories covered, encompassing all types of infrastructure projects. It is open to all users of Bentley software for sustaining infrastructure, and the winners are selected by independent panels of jurors comprising distinguished experts in the industry. The award was presented at the *Be Inspired Innovations in Infrastructure Conference* on November 14, 2012, in Amsterdam, Netherlands.

About IMMCO

Headquartered in Alpharetta, GA, IMMCO is a leading provider of enterprise solutions to the communications industries for the last seventeen years. IMMCO specializes in network design, data migration, business analytics, geospatial services, and enterprise software applications.
